## 'SCRIBNER'S MONTHLY,

THE SUMMER CAMPAIGN BEGUN.

"Another Great Literary Sensation."

THE MODERN ROBINSON CRUSOE

With 150 Beautiful Illustrations.

Messrs. Scribner & Co., have secured for serial publication in Scribner's Monthly, M. Jules Verne's Last Story.

"THE MYSTERIOUS ISLAND,"

in which, not content with the old stories of "Robinson Crusoe" and the "Swiss Family Robinson," the writer undertakes to show how a party of men cast upon a mysterious and desert island, may live by their scientific resources alone, without the aid of any wreck to furnish them with the materials of life and comfort.

The party are Americans who set out from Richmond, Va., during the siege, in a balloon. M. Jules Verne unites with an accurate scientific knowledge, an exuberance of inventive genius that has

Fascinated the World.

The theme of the present story affords the author the finest opportunity for the display of his peculiar gifts. The story will be profusely illustrated, and is begun in the April Number.

For sale by all new dealers or book-sellers. Price \$4.00 a year. 35 cents a number.

## THE HARRISBURG

## FAMILY CORN SHELLER.

Admirably Adapted for Family Use.

—30—

This Corn Sheller has a rotary movement, and is the first invention in this line that shells "without friction on the cob," and is, therefore, the easiest operating Hand Corn Sheller in existence. It cannot get out of order by use, will last for years, shells all sizes of corn ears, can be used by any one at first sight. It can be fastened to a bench, chair or table, or for portable purposes screwed to a small board, which will answer for a seat when using the implement. In shelling the operator grasps the butt of the ear of corn with the left hand, presents the small end to the shelling teeth and rotates the sheller with the right hand, the acute angular teeth penetrating between the rows of corn close to the cob, shelling very easily and rapidly; when the ear can no longer be held, the projecting cob is taken hold of by the right hand, and the sheller rotated with the left. This sheller does not scatter the corn. A boy of ten years of age can, without fatigue, shell from the cob a bushel of shelled corn in less than twenty minutes. The ordinary capacity of this sheller by a practical operator, on flint corn, is about five bushels of shelled corn per hour. This is the lowest priced and cheapest Hand Corn Sheller in the world. Price \$2 25.
